PROFILE

As a highly motivated college student with a passion for full-stack development and a knack for solving complex data structures, I am eager to embark on a rewarding career journey. With hands-on experience in front-end and back-end technologies, I strive to contribute my expertise to innovative projects that drive positive change. I have honed my skills in web application development and am enthusiastic about staying at the forefront of technological advancements. I am seeking an opportunity to work with a collaborative and forward-thinking team, where I can further expand my knowledge, foster creativity, and make a meaningful impact. Let's join forces to create a brighter, tech-driven future together!

PROJECTS

Crema   Aug 2023 - Aug 2023

The Crema Cafe Landing Page Development project is centered around creating an enticing and informative web page that showcases the excellence of Crema Cafe's premium hot beverages. The primary objective of this front-end development is to provide an immersive and visually captivating experience to potential customers, enticing them to visit the cafe or learn more about its offerings.

Ticketflix Tales   Mar 2023 - Jun 2023

The Movie Ticket Booking Portal is a web application designed to facilitate the seamless booking of movie tickets for various theaters and cinema halls. It aims to provide users with a user-friendly and efficient platform to browse movie showtimes, select seats, and purchase tickets for their desired movie screenings. The project incorporates both front-end and back-end technologies to handle different aspects of the booking process.

Hospito   Jan 2023 - Feb 2023

Hospito is a user-friendly and efficient online platform designed to streamline the process of booking appointments with hospitals and healthcare providers. It aims to prioritize patient's convenience and reduce their waiting time by implementing a time slot-based booking system. The website allows patients to schedule appointments with their preferred doctors and healthcare facilities without the hassle of long waiting queues. I've focused on Frontend in this project.

INTERNSHIPS

- **CodSoft - Web Developement Intern.**
- **Internshala - Student Partner.**
- **TechnoHacks - Web Development Intern.**
